

A UTC Fire & Security Company

Onity HT22i

- Superior user interface includes an easy-to read widescreen display
- Up to 8 check-in stations can be linked in a multi-front-desk configuration with up to 100 operators
- Optional internal modem available for remote update of the software or the locking plan and remote reporting capabilities
- Exclusive OmniMaster Masterkeying system: up to 100 different types of master keys assigned to 250 users by name
- Provides staff shift timetables
- Works with a wide variety of Onity stand alone locks and able to control full range of off-line and on-line Onity options
- Upgradeable to more advanced Onity systems
- Compatible with Onity Safes and Onity Energy Management Systems

Designed for small to medium-size properties of up to 500 rooms, the Onity HT22i offers a full array of features, including direct PMS interface, without requiring a PC. That means it will take up less space at your front desk, while still giving you the features you need.

The Onity System provides a smooth and efficient check-in, giving your guest's stay a great start. Fully-featured and easy to use, it's a powerful management system within a compact encoding unit. With the unique Insertion Technology encoding offered by the Onity manual insertion encoder, errors caused by improper encoding are reduced to virtually zero.

The Onity system operates with the Onity magnetic stripe electronic lock. And Onity operates 24 hours a day, 365 days a year to ensure you'll get the support you need, when you need it.

All Onity products are backed by Onity Worry Free Guarantee Worldwide and our commitment to provide the highest standards of service for our customers.

Onity Magnetic Stripe Electronic Lock Features

- Non-volatile memory records the last 500 lock openings—including date, time and card used.
- Low battery indicator lights alert hotel staff without disturbing guest.
- Programmable for the “office-mode” function (free passage).
- Corrosion resistant case for normal atmospheric conditions.
- Anti-tamper trims activated with a motorized clutch
- Lock ensures accuracy by reading the card twice; once during insertion and once during removal.
- Each new guest card overrides any previous guest card, preventing re-entry.
